

# Our Learning Methodology

## Academic Support

Our structured afternoons, with homework supervision, tingxie and spelling, also includes **enrichment for all subjects** - ensuring that every student stays on top of their school work.

## Specialized Interventions

We recognize that every child learns differently, and some require a more **tailored roadmap** to unlock their full potential.

*Specialized Dyslexia & ADHD Support are available as an add-on service.*

## Science-backed after school care

With an approach dedicated to holistic development, we cultivate structured autonomy by teaching children **how to think**.

## About Footprints STUDENT CARE

**Forget basic afternoon time-filling.**

At Footprints, we **kickstart lifelong habits**. Born from a partnership between seasoned educators and dedicated parents, we look beyond homework supervision. As part of Thinking Pathways Education, we coach students to master time management, take ownership of their tasks, and build real-world resilience.

## STUDENT CARE

## BUILDING SCHOOL-READY HABITS

*Executive Function (EF)  
Skills in bite-sized, daily routines*

Footprints Student Care Centre  
by Thinking Pathways Education

# Why Executive Function (EF)?

What it looks like in real life, and a few skills we actively coach:

## Task Initiation

"Go do homework now!"  
20 minutes later, still staring at the wall.

simple, first-step cues

## Emotional Control

Shuts down or melts down the moment something is a little difficult.

coping scripts practice

## Self-Monitoring

You get the 'blur sotong' look when you ask what's wrong.

self-check routines

## Working Memory

Can't keep track of what you just said **two seconds** ago.

self-run checklists

## Planning & Time Management

Has "no homework," then suddenly at 9pm: "Mummy, I need to submit two assignments tomorrow."

homework plan written by child

Executive Function (EF) skills, not raw ability, separate children who just get by from those who truly thrive. *And these skills can be taught.*

At Footprints Student Care, we **close that gap**. Instead of boring drilling, we translate professional coaching tools into **pocket-sized habits** a child (and a tired parent) can actually use.

**EF HABITS** only stick when home and centre speak the same language. Some tools we send home are:

- ✓ Shared scripts (phrases that work)
- ✓ Self-monitoring checklists + charts
- ✓ Real-time updates with behavior notes
- ✓ Your child's plan is mapped by the teachers who work with them daily.

How We Partner With You

# What Makes Us DIFFERENT

1

## Top-tier teaching

Run by educators and founders trained in Executive Function coaching to provide targeted, in-house support.

2

## Children before metrics

Our programs are tailored entirely to your child's unique profile, not group-wide corporate targets set by a head office.

3

## Evidence-backed curriculum

We go beyond standard homework supervision, and teach your child **how to plan, organize, and self-regulate**.

4

## Built for sensory recharge

A beautifully designed Bukit Timah sanctuary featuring in-house amenities and dedicated 'rest zones'.
